Energy Policy Statement

JJ Food Service Limited recognised that management of its own energy consumption and improvement in efficiency make sound business sense and demonstrate a commitment to the principles of sustainability and manage energy use.

JJ Food Service Limited is committed to a responsible energy management, energy efficiency improvement and compliance with energy related legislation. This commitment covers both our internal activities as well as activities carried out while delivering goods to our customers.

We are committed to a structured approach to Energy Management ensuring compliance with ISO50001, legal requirements, and other recommendations of good practice.

In order to meet its duty JJ Food Service Limited will seek to:

- Continually improve energy performance;
- Set objectives and targets for energy performance;
- Provide the necessary resources and make available information to measure and achieve the objectives and targets;
- Monitor, review and report on energy performance;
- Develop our employees to understand their responsibilities and involve them in the achievement of our goals and create a culture of energy efficiency;
- Encourage and support the purchase of energy efficient products and services and make energy efficiency improvement a key part in our design process. We will also encourage energy conscious design wherever applicable;
- Distribute and effectively communicate this policy and its importance such that it is fully understood at all levels of the company;
- Regularly review this policy and update as necessary to ensure it remains appropriate to the nature and scale of company energy use.

JJ Food Service Limited recognised that maintaining standards at current levels is not sufficient to meet future needs and are therefore committed to a continual improvement performance
